MACI raises local hiring estimates by 68%: 79 openings for 2011

Jackson, MI –Michigan Automotive Compressor, Inc. (MACI) has increased hiring projections for 2011 from 47 to 79 open positions.

Two factors account for the increase in hiring. As previously announced, the company is in the process of a two-year project to invest more than \$72 Million in new technology to produce variable air conditioning compressor units along with its current fixed-displacement products. At the same time, sales growth in the North American auto industry has translated to increased demand for current products.

Positions are available in maintenance, purchasing, quality assurance and production areas. Inquiries for production jobs should be made to Anchor Staffing at 517-622-7508. For salaried professions or skilled trades positions, contact 517-622-7502.

Michigan Automotive Compressor, Inc., or MACI, is the largest manufacturing employer in Jackson County with 562 associates. Established in the Parma-Sandstone business park on the west side of Jackson County in 1989, the company manufactures automotive air-conditioning compressor units for North American automotive manufacturers. Customers include General Motors, Chrysler, Ford, Toyota, Honda, Freightliner and John Deere. www.michauto.com.
