

Press Release

December 22, 2009

Maverick Industries is pleased to announce their purchase of the former Kaneka Texas Corporation facility located at 4335 County Farm Road in Blackman Township. Maverick's purchase of one the largest steam-chest molding facilities in North America brings tremendous opportunities to the Jackson, Michigan area. The building was formerly the site of an automotive supplier. Maverick Industries has purchased the building, land, and equipment and will begin manufacturing and servicing custom packaging.

Maverick Industries designs and produces innovative packaging solutions to a variety of high-growth industries. Maverick's unique packaging is environmentally friendly, returnable, reusable, and manufactured from recyclable material.

In February 2009 the Michigan Economic Growth Authority approved a seven-year, \$1.2 million high-technology employment tax credit to Maverick Industries. Additionally, the Michigan Supplier Diversification Fund assisted Maverick with financing by subsidizing a \$1.9 million loan to Maverick's lender, County National Bank.

County National Bank is headquartered in Hillsdale, Michigan with nine branches throughout Jackson and Hillsdale Counties. County National Bank took a strong interest in Maverick's endeavor to bring a new business to the facility and to bring jobs back to the community. "County National Bank really partnered with us to make this happen," said Tom Grace of Maverick Industries. "They really live their mission of investing in their community and helping to create new jobs in new industries."

Maverick Industries plans to begin production operations in January 2010. For more information, please contact customerservice@maverickind.com
